

AMENDMENTS TO THE CLAIMS

The following listing of claims replaces all prior versions of claims in the application.

1. (Original): A resin sheet, characterized in that it comprises a cured resin layer containing in a resin a glass fiber cloth-like material and inorganic particles, and is structured to have a haze value of 10% or lower.
2. (Original): A resin sheet according to claim 1, wherein a refractive index difference between a resin that forms the cured resin layer, and the glass fiber cloth-like material is 0.01 or less.
3. (Currently Amended): A resin sheet according to ~~any one of claims 1 and 2~~ claim 1, wherein the amount of the inorganic particles contained in the cured resin layer is 15 to 60 wt. %.
4. (Currently Amended): A resin sheet according to ~~any one of claims 1 to 3~~ claim 1, wherein the inorganic particles are silica particles.
5. (Currently Amended): A resin sheet according to ~~any one of claims 1 to 4~~ claim 1, wherein the resin that forms the cured resin layer is an epoxy resin.
6. (Currently Amended): A resin sheet according to ~~any one of claims 1 to 5~~ claim 1, whose coefficient of linear expansion is equal to or less than $5.0 \times 10^{-5}/^{\circ}\text{C}$ at 25 to 160°C.

7. (Currently Amended): A resin sheet according to ~~any one of claims 1 to 6~~ claim 1, whose light transmittance is 88% or more.
8. (Currently Amended): A resin sheet according to ~~any one of claims 1 to 7~~ claim 1, wherein a gas barrier layer is further laminated.
9. (Currently Amended): A resin sheet according to ~~any one of claims 1 to 8~~ claim 1, wherein a hard-coat layer is further laminated.
10. (Currently Amended): A liquid crystal cell substrate, characterized in that it comprises the resin sheet of ~~any one of claims 1 to 9~~ claim 1.
11. (Original): A liquid crystal display device, characterized in that it comprises the liquid crystal cell substrate of claim 10.
12. (Currently Amended): A substrate for an electroluminescence display device, characterized in that it comprises the resin sheet of ~~any one of claims 1 to 9~~ claim 1.
13. (Original): An electroluminescence display device, characterized in that it comprises the substrate for an electroluminescence display device of claim 12.

Preliminary Amendment
Attorney Docket No. 062568

14. (Currently Amended): A substrate for a solar cell, characterized in that it comprises the resin sheet of ~~any one of claims 1 to 9~~ claim 1.
